

# PC Forms Inc.

## Forms Management Solutions

Delivering quality products and services since 1995.

## Company Profile

**PC Forms Inc.** is a dynamic Ottawa based forms management consulting company established in early 1995 that is dedicated to client satisfaction. Our team is comprised of forms managers, forms designers, software developers, as well as systems integrators experienced in electronic forms, document management, and workflow solutions. As a team, we offer over 100 years of combined experience in the document management field within the Canadian Government.

We offer a variety of services consisting of forms analysis/design, project management, e-form studies, application and software development, as well as training on a broad range of topics within the forms management field, including electronic forms design. We also offer website development and implementation along with a variety of other specialties related to forms management.

Over the last several years **PC Forms Inc.** has had the privilege of being a Value Added Reseller (VAR) with most of the large e-form vendors across North America. Over this period we have learned a great deal, from what is being offered today, to more importantly...what is needed. This is the reason we have developed our own e-form solution...**IntuiForms**, which requires no client software and is a true enterprise solution.

**PC Forms Inc.** is capable of meeting your needs no matter how large or small the project. Whether you require our services for a few hours a week, in overload situations, or a complete team for an extended period of time...we're there for you.
